Aluminum Screw Cover

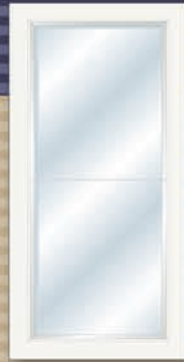

Titan Heat Vent

Summer heat can get trapped in between the storm door and entry door leading to condensation build-up or damage to the entry door's paint finish. The hot air is given a path to exit with this low profile device which is mounted on the inside top frame of the storm door. It features a sliding vent cap that can be opened during the summer and closed during the winter.

*Give Your Home the Beauty,
Energy Efficiency and Value
of High Technology*

- Our thickest door at 1 1/4" thick x 3" wide, the tempered aluminum angular styled Master Frame has reinforced extruded aluminum corners for extra rigidity and strength.
- Five (5) double brass bushing hinges for easy operation with a distinctive weatherstripped bottom expander.
- Included is your choice of hardware and the Speed Release® hydraulic closer for finger tip control.
- 3 handle styles in several finishes are available, all with a hydraulic closer matching the hardware finish.
- Interchangeable weatherstripped overlap style safety glass and screen inserts are standard!

Newport Storm Door Profile

Extra strong double hollow tempered aluminum extrusions are at the heart of the main frames on all Newport storm doors. Extruded aluminum hollow glass and screen inserts offering an extra tight weatherstripped seal no matter the season. Clear Lexan clips hold each insert securely in place and complement the door no matter the color.
