Innovative Glass Technology

3-Kr

triple glazed with Krypton

Since 80% of your window is glass, selecting the right glass package is a very important step in the window buying process. The 3-Kr Triple Pane Window Glass package does more than just lower energy bills. It delivers comfort, creates less condensation and protects valuables from sun damage. Plus, it meets specific solar and energy control needs for different climates and geographic regions nationwide.

What is in the 3-Kr Glass Package?

Triple pane I.G. unit featuring two surfaces of softcoat LowE Glass.

Triple-glazed windows utilize three panes of glass to dramatically reduce condensation and thermal transfer while also insulating as much as 60% better than double glazed windows.

Krypton Gas Fills both airspaces.

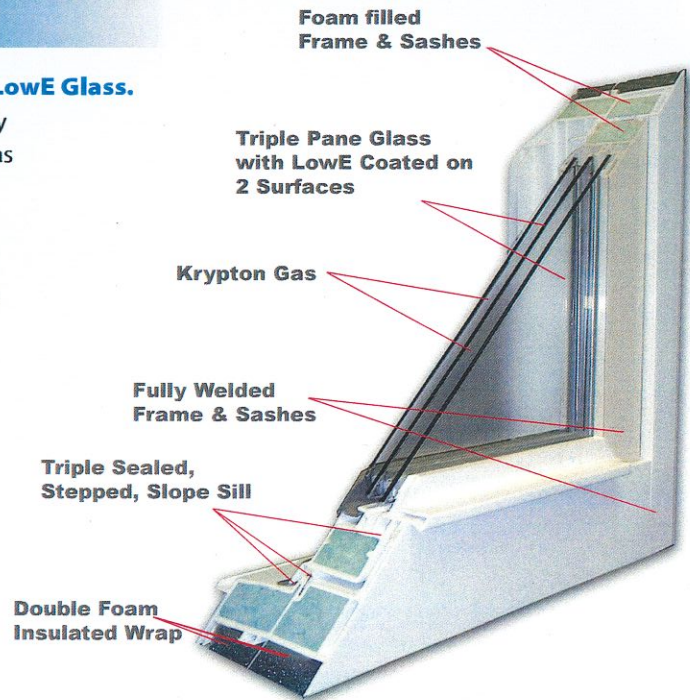

Krypton gas is a safe and rare atmospheric gas which is odorless, colorless, tasteless, and nontoxic. Because of its density, it is also a better insulator than argon gas.

Foam Filled Frame & Sashes

Foam filled frame and sashes can increase the insulating value of the window's frame and sashes by up to 30%.

Warm Edge Intercept Spacer

Increases the performance of gas-filled units and Low-E glass while improving resistance to condensation.
