### Titan Heat Vent

Summer heat can get trapped in between the storm door and entry door leading to condensation build-up or damage to the entry door's paint finish. The hot air is given a path to exit with this low profile device which is mounted on the inside top frame of the storm door. It features a sliding vent cap that can be opened during the summer and closed during the winter.

# ENDURANCE

## Give Your Home the Beauty, Energy Efficiency and Value of High Technology

- Our thickest door at 1 1/4" thick x 3" wide, the tempered aluminum classically styled Master Frame has reinforced extruded aluminum corners for extra rigidity and strength.
- Five (5) double brass bushing hinges for easy operation with a distinctive double weatherstripped bottom expander.
- Included is your choice of hardware and the Speed Release® pneumatic closer for finger tip control.
- 3 handle styles in several finishes are available, all with a pneumatic closer matching the hardware finish.
- Interchangeable weatherstripped safety glass and screen inserts are standard!

## Endurance Storm Door Profile

Extra strong double hollow tempered aluminum extrusions are at the heart of the main frames on all Endurance storm doors. Extruded aluminum hollow glass & screen inserts offering an extra tight weatherstripped seal no matter the season. Clear Lexan clips hold each insert securely in place and complement the door no matter the color.
